SUMMARY

Analyst at EY with a consulting foundation across the Gates Foundation, IKEA, and T-Mobile, who pairs quantitative rigor with a habit of building things end to end. Ships in Python and SQL: a monetized SaaS product, a published empirical study of LLM behavior on real occupational tasks, and analytics pipelines on live business data.

EDUCATION

University of California, Berkeley — Haas School of Business

Berkeley, CA | May 2025

B.S. Business Administration | Data Science coursework | GPA: 3.7 | Dean's List

PROFESSIONAL EXPERIENCE

Ernst & Young (EY) | FSO Assurance Associate, Banking & Capital Markets

San Francisco, CA | Jan 2026 – Present

- Analyze financial statements, reconciliations, and internal controls across 3–4 concurrent banking engagements, surfacing variances and material findings in risk summaries for client CFOs and leadership.
- Trace every reported figure to source evidence and document methodology to a standard that survives external review.

Gates Foundation · ABA Consulting | Strategy Project Manager (Contract)

Berkeley, CA | Jan – Jun 2024

- Built a quantitative partner-scoring methodology from scratch using 30+ peer-reviewed sources and 10+ expert interviews to evaluate strategic fit and operational capacity across major partner organizations.
- Led 8 analysts across 5 simultaneous workstreams and delivered a ranked shortlist and investment thesis directly to the Foundation's Manager of Strategy.

ABA Consulting | Senior Advisor, previously Project Manager

Berkeley, CA | May 2023 – Jan 2025

- Managed concurrent strategy engagements for Fortune 500, foundation, and nonprofit clients including IKEA and T-Mobile, owning timelines and leading analyst teams of 5–8 from scoping through executive delivery.
- Owned the end-to-end hiring pipeline, recruiting and interviewing 80+ candidates, and led professional development workshops on business analysis and market research for 80+ members.

Edison International | Asset Data & Strategy Implementation Intern

Los Angeles, CA | May – Aug 2023

- Improved team productivity 75% by designing an operations database that automated efficiency and headcount modeling, and built Power BI dashboards visualizing asset KPIs for leadership.

PROJECTS

Scaffolding vs. Scale — Empirical LLM Research | Independent Researcher

andreasjackson.com | Jul 2026

- Pre-registered and ran a study of 1,440 LLM outputs across 60 O*NET occupational tasks, building the full Python pipeline and evaluation harness, and joined results to BLS wage and employment data.
- Found that scaffolding degrades model honesty (unfounded claims rose 42% to 74%), and reported a stratified human validation that failed the pre-registered threshold and invalidated the study's own headline metric.

NotTomorrow.app | Founder & Full-Stack Engineer

Remote | 2024 – Present

- Designed, built, and monetized an AI-powered planning SaaS solo (0→1), shipping streaming LLM generation and a full subscription billing lifecycle end to end.

Data Centers & the Grid | SQL Analysis

github.com/Andreas-Ja | Jul 2026

- Analyzed 15 years of EIA electricity data in SQL to identify which states broke above demand trend and whether new generation is keeping pace, publishing the schema, queries, and findings.

SKILLS

Data analysis, financial analysis, financial modeling, forecasting, variance analysis, market research, market sizing, survey design, experiment design, LLM evaluation, workflow automation, stakeholder management, project management; Python (pandas, scipy, scikit-learn), SQL, R, Excel (advanced), Power BI, Git

INTERESTS

A weekly AI-generated economics digest, semiconductor and data-center trends, basketball, skiing, chess
